

OVERVIEW

Pretend you're in Vegas when you play American Roulette. Players can enjoy higher odds at the American Roulette tables because of the extra pocket which leads to extra outcomes.

In American Roulette, there are 38 pockets in total, 1-36 plus 0 and 00, the last of which you will not find in European Roulette. To play American Roulette, place your bets in the pockets, or go Red or Black or Odds or Evens if you prefer, before letting the ball spin around the table and hoping it falls in your lucky pocket.
